Fullstack Developer VueJS / Nuxt

Sokod, Tours (37), France

Description :

- Development of a website using Nuxt 3
- Deployment with Docker
- Design system implementation
- Nuxt : Nuxt content, i18n, Search engine optimizations - SEO

Stack :

- Frontend : VueJS / Nuxt 3 / Tailwind
- DevOps : Docker, NGINX

june 2022 → sept. 2023

Fullstack Developer VueJS + Python

Scortex, Paris (75), France

Description :

- Upgrade from Vue.js 2 MPA to Vue.js 3 SPA (composition api + script setup), thus improving its responsiveness, efficiency, and code management.
- Complete reorganization of file architecture to follow VueJS best practices. This approach enabled more efficient code management and simplified long-term maintenance.
- New application's design system overhaul integration
- New custom Vue.js components integration
- Close collaboration with the product team and the hardware team to develop an interdisciplinary functionality, thus illustrating my ability to work jointly with different departments of the company.
- Lead on Cypress tests to ensure the application works correctly at each stage of development
- Work on technical debt, thus helping to improve the overall stability of the application: analysis, brainstorming, fixes

Stack :

- Frontend : VueJS / Typescript
- Backend : Python / FastApi

may 2021 → june 2022
